THE LIVING TESTAMENT.

No Will for me post-mortem wealth to give, But will to make friends richer while I live. No cold bequests for sufferers when I'm gone, But warm and living hands to help them on. The things I have and hold are things to do with Not uscless dross that I at last am through with. (Copyright, 1914.)

Former Gov. Slayton has gone to Alaska on a pleasure tour. There are places further away from Georgia, but not on American soil.

Let us hope that the Cunard liner Orduna, with eight Americans among her passengers, and government's communication is mere polite diploa cargo which includes ammunition, will not intercept a German answer to our final note.

Senator Hoke Smith's denial of a statement from London that the United States made cotton contraband during the civil war is important principally because it discloses the fact that he is living in his country home in Warrenton, Va. What's the matter with Georgia, anyway?

"Here is the man; Johnson is the next President," declared Col. Roosevelt, pointing to Gov. Hiram Johnson, of California, as the two were surrounded by a crowd at the exposition grounds. But it must be remembered that Gov. Johnson was "next" to the Colonel all the time.

After more than 1,000,000 tests, an educational expert of the Russell Sage Foundation has ascertained that 93 of every 100 third grade children in the public schools spell "has" correctly. It's too bad Russell Sage can't be told of this wonderful discovery which his millions made possible.

President Wilson is going to Cornish for an other rest while he considers the next step in the crisis, the carrying out of his new policy with regard to Mexico, the draft of a note to Great Britain on neutral shipping, the advisability of calling Congress in extra session, the effect of the La Follette seamen's bill and the threatened nass vard strike. When he returns to Washington he expects to find some work awaiting him.

case, has joined the ranks of the opponents of the ture and exportation of munitions of war as those already enlisted in the movement would imagine that "Bridgie" would lend it strength. Incidentally he might extend his efforts in the direction of prohibiting the manufacture of weapons for his friends, the New York gunmen.

The Cologne Gazette announces that up to March as there have been granted five grand crosse, 6,488 iron crosses of the first class and 338,201 from crosses of the second class. For the whole of the Franco-Prussian war of 1870 there were eight grand crosses, 1,304 iron crosses of the first class and 45,791 iron crosses of the second clas. At the present rate the soldier who survives the war without receiving the decoration will be entitled to as much distinction as was enjoyed by "Private" John Allen.

Mayor William Hale Thompson, of Chicago, announces: "I will be a candidate for the Presidency of the United States in 1916 if the younger element of the Republican party wills it. The Republican party will come back in 1916. The younger blood of the country is demanding plain, practical dealings in our national affairs. That is how it happened that I am honored by being the chief executive of the great city of Chicago." Young Mayor Thompson evidently not only hates himself, but is long on nerve. The younger element of the Republican party will probably tell him to go and get a reputation.

A Long Island clergyman, in various disguises, the people of Europe cannot buy their products. including false beard and moustache, has been making nocturnal tours of the village of Bayonne, securing evidence against proprietors of cases and road houses. By threats to preach a sermon against them he has made them all mend their ways. That this peaceful method proved effective with the mild mannered neighbors of the great metropolis is not surprising, but of course it would never work in turbulent Washington, where the dangerous and desperate characters who frequent the cases have to be rounded up by raiding forces of intrepid policemen and bundled into patrol wagons.

The people of the United States have spent many millions in benevolent undertakings in the Philippines, Cuba and Mexico, but the Hon. John Wanamaker is surely a bit hasty in advocating and restore it to its people. In the first place it!

German Submarines Must Answer.

If it be true that diplomacy the civilized world over recognizes a deliberately unfriendly act of act, and that diplomacy's definition of a deliberately hostile act is an act of war; and if it be further presumed that the government at Berlin will accord diplomacy's recognition to the term "deliberately unfriendly," then the government of the United States, through President Wilson and Secretary Lansing, has finally placed before Ger- Penrose? many the choice of war or peace. It is possible though to take a slightly milder view of the outcome of the note delivered yesterday by Ambassador Gerard, and that is that this government may content itself with responding to any possible "deliberately unfriendly" act by a severance of diplomatic relations with Germany. This, if nothing else, must inevitably take place in the event that Germany's choice is the hostile one. That helper is? actual war might quickly come of the tense situation thus created there can be no doubt. So the

Mr. Wanamaker Comes Back.

John Wanamaker wants a Chinese protective wall around this country, so that nothing can get n or get out without paying a tax. He wants a higher tax on imports than we have ever had, and his most popular comedies, "You never can tell, Blaine was led to speak as he did, that the teachings of sages for Something must have been said by some showed that wives were a trial. a tax on exports which we have never had. He is sir. You never can tell." willing to have both import and export taxes prohibitive. It sounds strange from the great merchant prince of the United States, who is a large Thursday night. He said: "I believe if the house we live in is not safe our first duty is to make it a high tariff, and make it impossible for anything o come from abroad. We should put an export duty on things so high that they could not be purchased abroad. * * * It is time to hold what we have got; we must hold our iron, our cotton and a cessation there would be of self-assertion, resentother supplies."

This is rank heresy from an importer and it s ranker heresy to those who have been talking about our balance of trade amounting to \$1,000. 000,000. Secretary Redfield may send a letter of rebuke to Mr. Wanamaker, and the cotton planters, the wheat growers and the cattle men may rise up and call Mr. Wanamaker anything but blessed for proposing an export tax so high that

What has come over the spirit of our dreams r nightmares, caused by high tariffs? It is enough to bring back the spirits of Henry Clay, James G. There was a time in the past when Mr. Wanamaker was a high tariff advocate, and there was a tion factories, their plans can be defeated by vigi later time when he wanted the tariff lowered to lance.
